Course Language	English
Dates	August 3–14, 2026
Week 1 — Brasília	August 3–7, 2026 Lectures, institutional visits, and policy dialogues
Week 2 — Manaus	August 10–14, 2026 Amazon field immersion
Application Period	May 1 – June 31, 2026
Registration Fee	€850 (euros)
Credits (IDP Graduate and Undergraduate)	4 credits (8 ECTS) for undergraduate, Master's and PhD students
Credits (IDP lato sensu)	Certificate of Attendance

1. About the Course

The Climate Change Governance course offers an interdisciplinary and practice-oriented approach to understanding contemporary climate governance. Designed for postgraduate students and researchers, the course integrates theoretical foundations with field experiences, enabling a deeper understanding of the interactions among international law, political institutions, and economic instruments.

The course places particular emphasis on Brazil's experience in climate diplomacy, tropical forest conservation, the participation of Indigenous Peoples and traditional communities in climate governance, federative governance, the role of environmental agencies, and climate litigation — dimensions that gained renewed relevance in the context of COP30 in Belém.

By combining academic content with technical visits and direct dialogue with decision-makers and experts, the course offers an immersive exploration of the complexities of Amazonian environmental governance and the challenges involved in implementing climate policies in Brazil.

2. Course Structure and Locations

Week 1 — Brasília (August 3–7, 2026)

The first week takes place at IDP's facilities in Brasília and includes:

- Lectures by leading academics and practitioners
- High-level institutional visits to federal bodies (Federal Senate, Ministry of the Environment & Climate Change)
- Policy dialogues and case studies on Brazilian climate federalism and international governance

Week 2 — Manaus (August 10–14, 2026)

The second week takes place in Manaus, Amazonas, and includes:

- Amazon River and Rainforest field immersion
- Visits to research institutes and civil society organizations
- Dialogue with civil society organizations and traditional communities
- Seminar with representatives of the Amazonas State Government on regional climate governance
- Official reception by the Brazilian Navy — Northern Command

3. Course Objectives

- Analyze the institutional and legal frameworks and policy instruments at the international and national levels for climate governance;
- Examine how Brazilian federalism shapes the coordination, implementation, and accountability of climate policies;
- Evaluate the socio-economic effects of climate change in the Amazon and explore integrated solutions such as the circular economy, sustainable infrastructure, bioeconomy, and the energy transition;
- Investigate Amazonian governance, including Indigenous and traditional knowledge systems, biodiversity monitoring, and forest-based climate solutions;
- Engage directly with leading institutions — ministries, courts, environmental agencies, research institutes, and local communities.

4. Eligible Applicants

Applications are open to the following categories of candidates:

4.1 IDP Students and Alumni

- Currently enrolled students in IDP's undergraduate and postgraduate programs (stricto sensu and lato sensu)
- IDP alumni

4.2 Students and Researchers from IDP Partner Universities

- Undergraduate and Postgraduate students and researchers currently affiliated with an IDP partner university
- Applicants must demonstrate active institutional affiliation at the time of application or an invitation from IDP faculty member

5. Registration Fee and What Is Included

Registration Fee	€850 (eight hundred and fifty euros)
INCLUDED	NOT INCLUDED
